Motivated Computer Science Engineering student aspiring to work as a Software Developer. Experienced in building responsive web applications using modern technologies. Seeking an entry-level opportunity to contribute to impactful software projects and grow in a collaborative development environment.

Education

Dnyanshree Institute of Engineering and Technology, Satara	2025
B.Tech	70%
Yashwantrao Chavan Institute of Science, Satara	2021
XII	89.17%
Anant English School, Satara	2019
X	85.60%

Technical Skills

Frontend Technologies :	HTML, CSS, JavaScript, React.js (Basics)
Backend Technologies :	Java (Basics) , PHP (Basics)
Database :	MySQL
Tools and Platform :	Visual Studio Code, GitHub (Basics)
Soft Skills :	Team Collaboration, Communication, Adaptability

Projects

ERP Software for Raiban Electrical Solutions

- Developed a full-stack ERP system to streamline inventory, material, and store management operations.
- Built with PHP, MySQL, HTML, CSS, and JavaScript for real-time data tracking and reporting.
- Implemented modules for purchase stock, stock issue, material return, scrap/recycle, and Excel-based data import.
- Designed secure user authentication with role-based access and responsive dashboards.
- Enhanced workflow efficiency and reduced manual errors through automated record management.
- Successfully deployed and used in a real-time environment for Raiban Electrical's daily operations.

Deep Learning Based Spam Review Detection for E-commerce Platform

- Built a full-stack web application to detect spam product reviews using deep learning (BERT model).
 - Integrated a responsive React frontend with Flask-based backend services.
 - Implemented automated review scraping using Selenium for real-time data collection.
 - Designed secure login and registration with MySQL integration for user authentication.
 - Helped enhance user trust by filtering fake reviews and improving transparency.
-

Experience

Software Developer Intern - Raiban Electrical Solutions

Jan 2025 - Nov 2025

- Developed a full-stack ERP system using PHP, MySQL, HTML, CSS, and JavaScript for real-time inventory and store management.
 - Implemented modules for purchase stock, stock issue, material return, scrap/recycle tracking, and Excel data import with secure authentication.
-

Certifications

- Web Development (Coursera)
 - Front-End Web Development (IBM)
 - Web Full Stack Developer (AICTE)
-

Languages

English, Hindi, Marathi
